

Feedback[kopia]

End of second year

I received

- EU scholarship
- tuition waiver scholarship

How would you evaluate the EACH programme? Did it provide all that you hoped of it?

How do you evaluate your supervisor from your second-year university?

How do you evaluate your supervisor from UT?

Please evaluate your process leading to your master's thesis. Was the topic interesting to you? Was the topic relevant considering the trends in nowadays analytical chemistry?

How would you rate the facilities offered to you during your master thesis work (instruments, chemicals, manuals, etc.)?

How would you rate your competitiveness on the job market after graduating from the EACH programme? Do you consider the knowledge and skills obtained from the EACH programme useful for getting a job?

Concerning the job market, is there anything that EACH should include that is currently missing?

Have you already started to look for a job/position? If yes, what is the current status? (job started, been to some interviews, already secured a job/position, ...)

Any other feedback related to EACH that you would like to mention?
